MOKUAWEWEO INACTIVE.

Continued from 1st Page.

The evening was pleasantly spent with whist in the ladies' parlor and euchre in the old sitting room. Arrangements were announced for an early start for Hilo next morning. I had almost forgotten to mention the volcano of Mokuaweeweo altogether. It had indeed forfeited all favorable mention. After all we had done to do honor to its greatness, to have it sneak out of sight under cover of the clouds was almost disappointing. It was a great disappointment to those who came up by the Hall and the Kinau this week, that they could not see even the reflection of the eruption, with the exception of a few minutes on Sunday night. That was the last sign of activity seen from the Volcano House. The light while the clouds lifted briefly, then, was as intense as I had ever seen it. Clouds shrouded the summit from that time until Thursday, and then cleared long enough to show that smoke was no longer ascending. The night before I saw a star close to the dome, near the summit, but not a bit of reflection from earth's fires, and then suspected that the show was over. All of the members of the expedition that went up from here a week ago Tuesday are congratulating themselves over their good fortune in having been in time to see the brief but brilliant exhibition. ## CATCH PRICES

simply used as bait, won't bring permanent business. We want permanent business. We are getting it too. The regular every day dealings, where we save our patrons money on every purchase, is telling in our favor.

It isn't our policy to advertise prices and after a while put them back where they were originally. When we cut prices, we never put the price back. Our business methods are fair, square and above board. We do just as we say we will. We live up to everything we advertise.

Barry's Tricopherous 25c., old price 50c.  
Fig Syrup 35c., old price 50c.  
Camelline 25c., old price 50c.

These are a few of the liberal prices we accord our friends. We have not enough room to enumerate them all here. You will get cut-rate prices.

## The : Secretary : Disk : Plow.

AGRICULTURAL COLLEGE, MISS., Jan. 29, 1896.

DR. C. W. DARNEY, Washington, D. C. DEAR SIR: Yours of recent date in regard to the "Secretary" plow has been on my desk some days, but I delayed sending a reply in order that I might send some photos which go with this.

Deere & Company sent one of the plows, the first one which was completed, to this station, and we gave it a very thorough test in December last. The ground on which it was used was a field which had never been plowed more than six inches deep, and which had been in red clover for three years. With three good mules we were able to plow ten inches deep without making the work too hard for the team, and by working slowly a part of the ground was plowed to a depth of fourteen inches. The plow certainly does better work than I have ever seen done with any other implement. S. M. TRACY, Director.

Mr. Tracy, in a letter to Deere & Company, says: I have never seen ground left in as good condition after the plowing, the furrows being thrown so as to pulverize the soil more thoroughly than can be done by an ordinary plow, and all trash and weeds were completely turned under.
